

# C<sup>o</sup>zzer

When it comes to visuals arts, I always try to keep my VJ alter ego in mind...  
“The Organik Mechanik.”

With that as a guiding theme I try to create a mind twisting blend of motion graphics with well cut video. I love to promote spirituality and poke fun at the modern MTV-esque sexuality. In my tenure as a VJ I have done much more material and performance in the area of house and trance, yet it is my personal opinion that my content for dub/breaks/dnb is a tad better or perhaps untapped. While I have used the works of other VJs and visual artists, I pride myself on being able to provide almost all of my content personally or in collaboration with my peers. Depending on the show I sometimes use live feed video. However, I'm not a huge fan of leaving "I.Mag" on the DJ for long periods of time. Live acts and deep crowds of course create exceptions to the rule.

My experience spans six years of parties, clubs, concerts, and festivals. I have stood in front of crowds of 5000 as well as crowds of 5, and with few exceptions I have loved them all. I have held three residencies in the Southern California area, two of which I was responsible for the installation as well as the performance. From traditional mixing to media servers and LED, I have had the good fortune to work with and master the latest tools of the video world.

My passion for creation and the live visual arts have driven my success in the industry. My performance is always an enhancement to the culture and dance experience.
